Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claims 1-28 are pending for examination.

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
 - I. Claims 1-25 and 28, drawn to a method and an apparatus for providing streaming data from a server to multiple clients comprising a gateway located between the server and the client, wherein the gateway includes:
 - a) means for obtaining streaming data from the server upon receipt of a first request for a stream from any of the client; and b) means for providing the stream from the gateway to second and subsequent clients requesting the stream, classified in class 719, subclass 311.
 - II. Claims 26-27, drawn to a software interface application in an object-oriented environment comprising **means for changing an address type of a data packet from a) unicast to multicast, or b) multicast to unicast, or c) a first multicast address to a second multicast address, or d) a first unicast address to a second unicast address**, classified in Class 719, subclass 328.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method and an apparatus, for providing streaming data from a

Art Unit: 2153

server to multiple clients comprising a gateway located between the server and the client, lack of: **means for changing an address type of a data packet from a) unicast to multicast, or b) multicast to unicast, or c) a first multicast address to a second multicast address, or d) a first unicast address to a second unicast address.** See MPEP § 806.05(d).

3. Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a software interface application in an object-oriented environment lacks of: a) means for obtaining streaming data from the server upon receipt of a first request for a stream from any of the client; and b) means for providing the stream from the gateway to second and subsequent clients requesting the stream. See MPEP § 806.05(d).

4. These inventions are distinct for the reasons given above, and the search required for each Group is different and not co-extensive for examination purpose.

5. For example, the searches for the two inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:

Art Unit: 2153

(a) Group I search (claims 1-25 and 28) would require use of search class 719, subclass 311 (which would not required for the group II).

(b) Group II search (claims 26-27) would require use of search class 719, subclass 328 (which would not require for the group I).

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed.

7. Applicant is reminded that the required for response to this requirement is 30 days, not one month.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Krisna Lim whose telephone number is (703) 305-9672. The examiner can normally be reached on Monday-Friday from 9:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Glenton Burgess, can be reached at (703) 305-4772. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-9700

Communications via Internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [glen.burgess@uspto.gov].

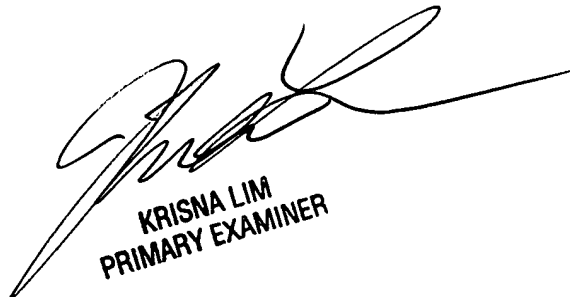

All Internet e-mail communication will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a
